

The Scholars Program enables undergraduate students to make the most of their university experience. It helps them develop effective study and work habits, challenges them to be involved in the broader community, and familiarizes them with the roots of Western civilization and the rich tradition of Christian thought.

The Scholars Program is available in:

ERNESCLIFF COLLEGE

156 St. George Street

PERSONALIZED ATTENTION

Each Scholar is partnered with a mentor who shares experience and advice to establish personal and career objectives. One-on-one mentoring is the keystone of the program, as it ensures that Scholars develop the skills they need to achieve their potential.

PROFESSIONAL DEVELOPMENT

Workshops on practical topics help Scholars gain skills to succeed as a student and as a professional. Professionals and upper year students share in these discussions the methods they practiced to achieve a high level of proficiency.

INTELLECTUAL ENGAGEMENT

Evenings of conversation help Scholars broaden their horizons and engage in thought provoking discourse with their peers and guests. Seminars and lectures exploring social justice and other topics of cultural, social, artistic and professional importance are also offered to develop a clear understanding of key issues for a leader of today.

COMMUNITY OUTREACH

Scholars develop leadership skills through active participation in service activities in their local community, throughout the country and internationally, during the school year or the summer.
